

Thuraya

Mobile Voice & Data Communications

Reliable Voice & Data Access in the Most Remote of Locations – for Less

Organizations operating in remote locations on land or sea face serious communication challenges. Workers on an off-shore oil platform need to communicate with their corporate headquarters or family and friends on land. NGO volunteers in desolate areas of Africa or Asia need to reliably connect to the home base. Government agencies and the military operating in unstable environments with little infrastructure require Beyond Line-of-Sight (BLOS) communications.

Thuraya, a fully capable Mobile Satellite Service (MSS) network solution from TrustComm, meets the satellite communications voice and data needs of organizations throughout Europe, Africa, the Middle East and Asia.

Highly Mobile, Aggressively Priced MSS Solution

Thuraya provides a highly reliable satellite communications services for end users who demand resilient, secure voice and broadband data access, delivering personal, portable, on-the-move and offshore solutions. Plus, Thuraya is available with flexible and highly competitive pricing packages that allow you to do much more for much less.

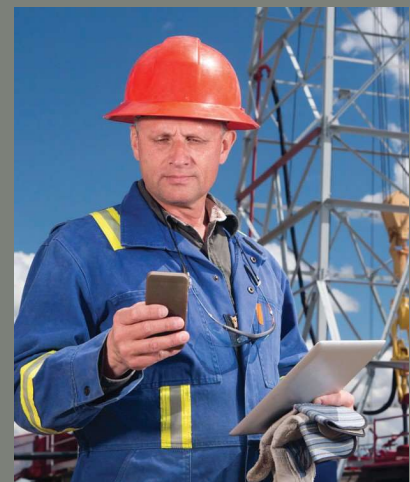

Fast, Flexible Solutions to Fit Your Needs

With hardware options ranging from the handheld SatSleeve that turns your smart phone into a satellite phone, to small and discreet mobile, vehicular or maritime terminals, accessing and benefiting from the Thuraya network is quick and easy.

With land-based or sea-based terminal options providing 444kbps on standard IP and 384kbps on streaming IP, or hand held devices delivering voice and data access in over 160 countries covering 2/3 of the planet, Starlight has the right land and sea system to cover your specific needs.

Benefits

- Stay connected on land or sea
- US run & managed MSS
- Improved security & convenience
- Manage, track your accounts from anywhere
- Work more efficiently in the most remote of locations
- Significant cost savings compared to other MSS services
- Flexible service plans means no wasted minutes or expense

Thuraya

Easy to use

Thuraya requires no specialized technical expertise to set up or use. You can use the same device wherever you need it. Plus, there is no need to deal with compatibility issues with local telecom networks since you automatically connect directly to the satellite network.

IBIS – Powerful, Simple Account Management

IBIS, TrustComm's Integrated Billing Information System, provides customers with the ease and convenience of managing their accounts from anywhere via the internet.

With IBIS, Starlight customers can:

- Access detailed account information, status, usage & costs
- Review all call traffic detail with customized traffic reporting
- Track all active & inactive SIM cards
- Stay on top on invoices and payment
- Request and track customer & billing support
